

ShipMax Issues

Quotation Module

Critical Issues

- Incoterms: Buyer pays ocean freight, but system behaves like customer pays everything. Field exists but is not connected to pricing or billing.
- FCL cargo can be saved without container count (e.g., 0 containers carrying cargo), which is logically invalid.

High Priority Issues

- Quotation date format is MM/DD/YY; it should be DD/MM/YY.
- Start Date and End Date are not mandatory; quotation can be saved without dates.
- Salesperson updated in Masters is not automatically reflected in Quotation.
- Carrier option allows adding charges but validation issues exist.
- Currency is not auto-generated for carrier charges.
- After confirming quotation, Booking page should auto-fill but does not.

Booking Module

Critical Issues

- System allows saving booking without container details and container number.
- Save validation missing: booking can be saved even if carrier, consignee, container, or charges are missing.

High Priority Issues

- Consignee details are not copied from Quotation.
- Container information does not show container type (20GP / 40GP) and number of containers.
- System allows saving after deleting all charges; warning should be shown.
- Start Date and End Date should be mandatory; system allows saving without Start Date.

Shipment Module

Critical Issues

- Shipment can be saved without Consignee, Consignor, and Local Client.
- Port of Discharge and Routing are not mandatory.
- Most important shipment fields are not mandatory, allowing incomplete shipment records.

High Priority Issues

- Container details are not copied from Booking.
- Container type is not displayed in Shipment.

Consol Module

Critical Issues

- Confirm button error exists in Consol and affects Save button functionality.
- Mandatory operational fields are not enforced, allowing invalid consol records.

High Priority Issues

- Client, Consignee, and Consignor data are not auto-pulled.
- Mandatory fields not enforced: Origin, Destination, Port of Loading, Port of Discharge, Carrier, Transport, Container, Vessel, Voyage Number, HBL Number.
